

Got Spare Capacity?

**Running your disks at full capacity can be pretty risky too!
You leave yourself open to a server crashes and terrible application
performance.**

**Otium Software's Utilistor™ Storage Management products monitor
your storage and warn you if capacities and I/O rates are reaching
dangerous levels. They also analyses all of your data and let you
know if you are storing data you no longer require .**

**With prices starting at less than £100 per server, Utilistor™ is
something you can't afford to leave behind!**
