

Don't Push Too Hard!

Even the most finely tuned engines can't cope if you push them too hard.

Disk drives are the same!

If they are over worked they can crash, applications halt, and business can stop.

Otium Software's Utilistor™ Disk Space Monitor (DSM) keeps watch over your disk I/O and capacity levels alerting you if systems are being over-worked.

With pricing starting at less than £100 per server, you won't be over working your budget either!

Providing the Obvious Answer
